
ÜBERMILK

coffeeangel

The Ubermilk One is ideal for high-volume, quality and workflow focused locations.

Foam milk efficiently and repeatedly to the ideal volume, temperature and texture to consistently produce sweet and velvety micro-foam for your milk-based drinks.

- Perfect and consistent milk foam on demand
- Infinity Mode for use during peak periods
- Individual dosing minimises milk waste and maintain food costs
- High resolution, one-touch digital display
- Hygienic milk frothing from start to finish
- Simple semi-automatic cleaning program

Materials:

- Both casing and milk heating elements are 100% stainless steel. All parts are food-safe and FDA approved.
- Your three color choices are Black, White and Silver (stainless-steel).

Dimensions:

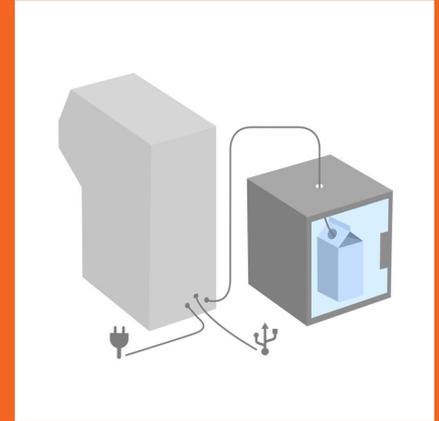

- Width: 180MM
- Height: 540MM
- Depth: 485MM
- Weight: 25kg

Connections:

- 3.1kW / 50-60hz / 13A 1P. Standard 208-250V power supply
- Connects to fridge via flexible hose

Installation:

- Adequate counter space is required
- A milk cooler / fridge must be within 1.5M of the Ubermilk unit
- A 10MM hole is required in the counter and fridge
- A standard dedicated 13A, single phase socket is required capable of handling 3.1kW

Cleaning:

- Peak performance from the Ubermilk One is ensured by adherence to the mandatory, semi-automatic daily cleaning procedure
- Cleaning records are stored within the management console of the unit
- Both Alakaline and Acidic cleaning agents (sold separately) must be used throughout the work week to ensure quality and consistent milk foam

When used correctly, the Ubermilk One will deliver high-quality milk foam:

- Efficiently
- Repeatedly
- Consistently

The Ubermilk One will also improve workflow and can - dependent on your use case:

- Increase coffee volumes
- Reduce milk waste
- Reduce labour costs

Daily essentials:

- One filter disk / day. Sold separately in packs of 40
- Ubermilk specific detergents - both Alkaline and Acid - to be used on alternate days. Sold separately in 1L bottles
